Welcome guests at:

QUICKO

Single integration with Quicko enables instant issuing of digital and plastic cards.

We can also help you to:

- perform an online KYC process,
- initiate money transfers and QR payments,
- issuing physical cards
- creating virtual business cards,
- integrate with ApplePay, GooglePay and other payment solutions,
- take your business to the next level with many more services!

Here you can find:

API's
User-friendly API and documentation with examples. Let's integrate with ease.

Integration plan
Clear project plan with division of tasks for better cooperation.

Good practices
Thanks to our experience we can share proven tips and tricks to avoid erroneous paths.

Our products description
Product descriptions from both the business and technical sides. We will help your customer understand the services you provide.

Q&A section
There are no stupid questions - we will answer all of them and provide additional tutorials.

Test scenarios
We know how to spot bugs, our test scenarios are constantly evolving.

Integrate with ease!
